

ANOVA

FINANCIAL NETWORKS

Anova has partnered with a leading TransAtlantic cable company to launch the fastest available ultra-low latency route from Chicago to London—crucial for financial trading. By combining AFN’s industry-leading wireless link from Chicago to New Jersey with a high-speed transatlantic fiber system, this solution delivers unmatched one-way latency from CME to London and across Europe. Financial firms gain access to a fully integrated, commercially available service—eliminating the need for complex, high-cost builds—designed to meet growing demands for speed and performance. The network supports Ethernet/802.3 traffic with standard packet sizes from 64 to 1518 bytes.

Latency Chart

A LOC	Z LOC	Latency
DC3	LD4 - Slough, UK	33.762
DC3	FR2 - Frankfurt, Germany	36.033
DC3	IT3 - Bergamo, Italy	37.086
